

# Why collaborate with Matts Digital ?

Reverto User Case

**MATTS DIGITAL**  
ARVR SOLUTIONS AND SERVICES

REVERTO

CHANGEZ DE PERSPECTIVE

A close-up photograph of a person's hands typing on a laptop keyboard. The person is wearing a black and white striped long-sleeved shirt and a black wristwatch. The laptop is open on a white desk, and a white mug is visible in the background. The lighting is warm and focused on the hands and keyboard.

# A common goal

---

**Reverto has collaborated with the Ministry of Justice to create a solution to combat recidivism of domestic violence. The objective is to use virtual reality (VR) to reduce the risk of recidivism among perpetrators of domestic violence. By putting on the virtual reality headset, the perpetrators become the victim or witness of this violence. They will then be able to explore different emotions such as empathy, which will eventually break the cycle of violence and change behaviors. In order to propose a hardware solution adapted to the needs of the ministry, Reverto called upon Matts Digital.**

# The support of a logistician

## From the development of your project...

---

In September 2020, Reverso signed an innovative contract with the Ministry of Justice to fight against recidivism of domestic violence.

In order to facilitate the acquisition and deployment of headsets for the ministry, Reverso called upon Matts Digital, a distributor of virtual and augmented reality solutions and services. Matts Digital then built a complete and customized offer for the ministry, including PICO G2 4K headsets, hygiene kits, protective cases as well as a service package including programming of the headsets, pre-installation of Reverso's content, and a hotline ticket for the hardware, in order to make everything ready to use.

**«We onboarded Matts Digital at the early beginning of the project because we knew that logistics and support would be crucial to its success.»** said Guillaume Clere, Reverso's executive director.

Matts Digital offers a complete range of products and services to support 3D content and software publishers, as well as companies and administrations in the deployment of Virtual Reality solutions. These services include project management, technical support, preparation and programming of headsets, as well as a unique logistic capacity based on an industrial tool of more than 20 000 m<sup>2</sup>. Through this partnership, Reverso and Matts Digital have supported the Ministry of Justice in the implementation and deployment of their Virtual Reality solutions.

## ... to its outcome.

---

This facility has now been set up with 28 volunteer prisoners in the SPIP (Penitentiary Integration and Probation Service) of Meaux, Villepinte and Lyon.

The goal is then to ensure a national deployment of this solution, namely 103 SPIP. This project is on the right track as Reverso is currently participating in the Village by CA Awards for this application.

**« Working with Matts Digital allows us to work smoothly and offer a full range of products and services to our customers. Before, it was very complicated because we didn't have the logistical capacity, or the number of people needed to respond to large-scale projects. Matts Digital knows our organization, how we operate, how our application works, and can therefore advise our customers, depending on their needs. It takes the logistical burden off our shoulders. Our clients are satisfied every time because we provide them with ready-to-use turnkey solutions. »**
